

WE MAKE **it** HAPPEN

# IT Analyzer

Optimize IT Resources and Performance  
Across the Organization

Do you **Really** know  
*How much of your storage is in use?*

Are you **Sure** you can  
*Recover your backed up files & servers?*

Are you **Convinced** you don't have  
*More available resources in your SAN area?*

## Company's day-to-day reality

- Business environment is changing constantly
- Competition is aggressive
- System environment is becoming very complex
- IT team needs to manage multi-vendor systems
- IT needs to cut operational costs, without sacrificing business efficiency
- IT needs to answer questions quickly and accurately

## Can the IT team deliver?

Align IT infrastructure with company's strategy and deliver IT efficiency, quality of service and cost effectiveness with IT Analyzer.

**Collect** all IT data from your existing system:

- **No interference** with your existing system.
- **No client** installation.

**Analyze** the collected information across company's IT environment:

- **Support** multi-vendors.
- **No need** for software updates.

**Display** information in various reports:

- **Pre-packaged** analysis tools (more than 150 reports).
- **Fast and simple** to use.

## Simplified approach in one click

- Inventory: View your virtual and physical environments together
- Inventory: Identify HBA components
- Storage: View Disk Maps of Storage divided to LUN's per device, storage Raid Group and per HOST
- Backup: Immediately detect possible logical errors in backup environment configuration
- SAN: Locate SAN Switches and Ports that are not used correctly; (wrong Zone, wrong Port, no member in Zone, etc)
- Storage: Map relationships between the files located on file system to the physical disks
- Backup: View backup tapes activity per hour, per day -improve backup times by 30% or more
- Storage: Create graphs showing the optimal way to structure the actual storage assignments
- ROI: receive concise data about resources not being fully utilized (MASK without LUN)

**Return On Yesterday – make use of the resources available in the organization**
